Available Days	Mon, Tue, Thu, Fri, Sat,
Inclusions	• Lunch
Exclusions	• Does not include transfers

Experiences

- ✓ Cooking
- ✓ Food & Wine
- ✓ History & Culture

Journey off the beaten path to a traditional village on the Sorrento Peninsula for an immersive experience that celebrates local life, agriculture, and culinary traditions. This is not a staged tourist activity, but a genuine glimpse into how families in the region have lived and worked the land for generations.

Your experience begins with a walk through the family's historic lemon grove, where you'll learn about the importance of Sorrento's prized lemons and breathe in the fresh citrus air that fills the terraces. From here, you'll be transferred through the village in a classic Italian Ape car—the iconic three-wheeled vehicle originally derived from the Vespa, offering a fun and authentic way to travel between locations along the narrow village lanes.

Next, enjoy a mozzarella-making demonstration where the art of crafting fresh fior di latte is revealed, followed by tastings of regional specialties including Provolone del Monaco, locally produced olive oil, and Sorrento's famous limoncello, paired with local wines. The experience concludes with a hands-on Neapolitan pizza-making session, where an expert pizza chef will guide you through traditional techniques as you shape and bake your own pizza for a relaxed and delicious lunch.

After the experience, you can on to Sorrento City Centre to enjoy some free time to explore the town's lively streets, boutiques, and cafés before your return transfer.
